SUB_7	Check for the presence of a "Back" button or back arrow in the payment window	Payment cancelled. The user has been returned to the paid plans screen.	PASSED	

Checklist conclusion:

Module	Test-cases	Passed	Failed	Bug-reports
Registration	6	5	1	1
Localization	6	5	1	1
Subscriptions	7	7	0	0
Total	19	17	2	2

***Conclusion:** *The EatBook v1.1.5 checklist has been completed. Nineteen items across three modules were verified: registration (6), localization (6), and subscriptions & payment (7). Two bugs were identified:*

1. The 'Email' field accepts incorrectly formatted email addresses—a major bug that violates requirements and causes errors.

2. An internal message is not translated into Ukrainian—a minor bug affecting the UX for Ukrainian-speaking users.

Recommendations:

- 1. Implement proper handling for email addresses to ensure the correct format.*
- 2. Translate all internal messages for the Ukrainian locale.*

Overall, the application is stable but requires the identified bugs to be fixed before being handed over for regression testing.
