

ID: TC002_APP1_LOCALIZATION

Status: **FAILED**

Title: Verification of the accuracy of the interface translation into Ukrainian

Priority: Medium

Testing type: Localization testing

Author: Dmytro

Date: 03.07.2026

Preconditions:

- The app has been installed and opened.
- The user has «Basic plan» in program.
- The user is on the main screen.
- The Setting section is open.

Steps:

№	Action	Expected result	Actual result
1	Press the language switching button labeled "Language".	The language change window opens.	The language selection window opened.
2	Press the button with Ukrainian language	The app language changes to Ukrainian; switching to the main screen.	The app language has changed to Ukrainian. Navigating to the main screen.
3	Open the "Pantry" tab from the main screen.	The "Pantry" screen is open	The "Pantry" screen opened.
4	Wait for the message indicating that a user with the "Basic Plan" does not have access to the "Vault."	The message is displayed in Ukrainian.	Internal messages are displayed in English, even though the app language is set to Ukrainian.

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.1.5

Network: Wi-Fi

***Conclusion:** *After the language is changed, the program continues to display internal messages in English (even though Ukrainian has been selected). This bug may cause inconvenience for Ukrainian-speaking users.*
