

ID: BUG002_APP1_LOCALIZATION

Type: Bug

Summary: Internal messages are displayed in English, even when the app language is Ukrainian.

Severity: Major

Priority: High

Author: Dmytro

Date: 03.07.2026

Environment: Samsung A26 5G, Android 16, App: v1.1.5

Preconditions:

- The app has been installed and opened.
- The user has «Basic plan» in program.
- The user is on the main screen.
- The Settings section is open.

Steps to Reproduce:

1. Press the language switching button labeled "Language".
2. Press the button with Ukrainian language
3. Open the "Pantry" tab from the main screen.
4. Wait for the "access denied" message to appear.

Actual Result:

- The language selection window opened.
- The app language has changed to Ukrainian. Navigating to the main screen.
- The "Pantry" screen opened.
- Internal messages are displayed in English, even though the app language is set to Ukrainian.

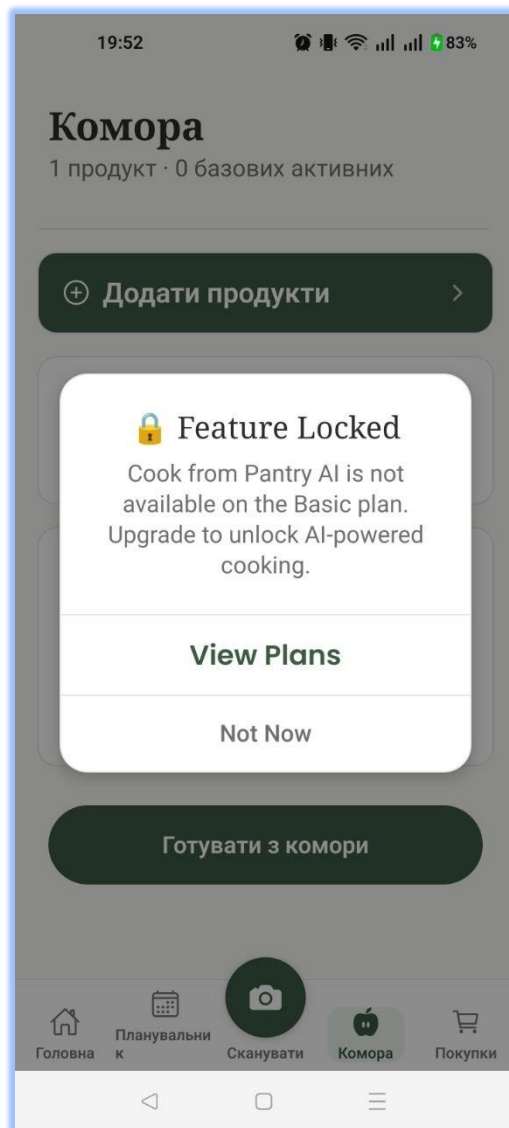

Expected Result:

- The language selection window opened.
- The app language has changed to Ukrainian. Navigating to the main screen.
- The "Pantry" screen opened.
- The internal system message must be displayed in Ukrainian, in accordance with the selected application language.

Business Impact:

This error negatively affects the experience of Ukrainian-speaking users. Although it does not prevent features from working, it creates the impression that the application is not fully localized, which can reduce user trust and retention rates. This is particularly important if the application targets the Ukrainian market.
