

ID: TC004_APP1_EP001

Status: **PASSED**

Title: Verification of valid subscription periods (Equivalence Partitioning)

Priority: High

Testing type: Equivalence Partitioning (EP)

Author: Dmytro

Date: 04.07.2026

Preconditions:

- The app has been installed and open.
- The user has «Basic plan».
- The user is on the main screen.

** According to the documentation, the user must be able to choose from the available plans: 1 month, 3 months, 6 months, or 1 year.*

Steps:

№	Action	Expected result	Actual result
1	Open the «Settings» section	The «Settings» tab opens.	The «Settings» tab opens.
2	Press the «Upgrade Pro» button to	The «Upgrade plan» tab opens.	The «Upgrade plan» tab opens.
3	Choose the «Pro» plan.	The selected plan is highlighted.	The selected plan is highlighted.
4	Select the «1 month» period.	The selected period is highlighted.	The selected period is highlighted.
5	Click «Pay»	The payment method selection window opens.	The payment method selection window opens.

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.1.5

Network: Wi-Fi

***Conclusion:** *The Equivalence Partitioning (EP) technique was used to optimize the number of tests. Instead of testing every possible period, only one representative from each valid class was selected. This reduced testing time without compromising coverage quality. If the system accepts '1 month,' it will accept any other valid period, as the processing logic is the same.*
