Status: **PASSED**

Title: Checking combination conditions for subscription activation

Priority: High

Testing type: Decision Table (DT)

Author: Dmytro

Date: 04.07.2026

Preconditions:

- The app has been installed and open.
- The user is registered and successfully verified.
- The user has «Basic plan».
- The user is on the main screen.

** According to the documentation, to obtain a subscription, a user must be registered and successfully verified, navigate to the plan selection tab, choose one of the available subscriptions, and complete the payment. Additionally, the subscription duration depends on whether the user is new, in order to grant them a trial period for paid features.*

Decision Table:

Condition	1	2	3	4	5
New user	Y	Y	N	N	Y
A trial period is available.	Y	N	N	Y	Y
Payment completed	Y	Y	Y	Y	N
Result: subscription is active	Y(trial period)	Y	Y	Y(trial period)	N

Y – yes; N – no.

Steps:

No	Action	Expected result	Actual result
1	Open the «Settings» section	The «Settings» tab opens.	The «Settings» tab opens.
2	Press the «Upgrade Pro» button to	The «Upgrade plan» tab opens.	The «Upgrade plan» tab opens.

3	Choose the «Pro» plan.	The selected plan is highlighted.	The selected plan is highlighted.
4	Select the monthly period	The selected period is available.	The selected period is available.
5	Click «Pay»	The app providei access to payment.	The app providei access to payment.
6	Make a payment	Paid features are available to the user.	Paid features are available to the user.

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.1.5

Network: Wi-Fi

***Conclusion:** *A decision table was used because there are multiple conditions affecting the outcome. Instead of testing each combination individually, a matrix was created to display the possible scenarios. This made it possible to verify that the subscription activation logic functions correctly for all user types—both new users and those who had previously used a trial period..*
