

ID: TC_APP2_EMAIL_VALIDATION_04

Status: **FAILED**

Title: Check if the system rejects emails with Cyrillic characters

Priority: High

Testing type: Regression testing

Author: Dmytro

Date: 06.07.2026

Test Data:

Email: regress_test_+20260706@example.com

** "Other fields (Name, Password, Confirmation) are filled with valid data (to activate the button) "*

Steps:

No	Action	Expected result	Actual result
1	Enter email " regress_test_+20260706@example.com " in the Email field	The field is highlighted in red, the text "Enter a valid email" appears.	The field is NOT highlighted in red. The text "Please enter a valid email address" does NOT appear.
2	Press "Create Account" button	Registration does not occur, the button gives an error	User registration is taking place, the button does NOT give an error

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.2.2

Network: Wi-Fi

***Conclusion:** The program registered the user with their email address containing Cyrillic characters. A bug report has been filed "BUG001_APP2_EMAIL_VALIDATION"
