

Title: Checking the clarity of button assignments on the card screen**Objective:** Check whether the process of learning words using flashcards is intuitive**Priority:** Medium**Testing type:** Usability Testing / UI Testing**Author:** Dmytro**Date:** 09.07.2026**Task:** The user must add words from text to the word cards that he does not know and listen to them.**Preconditions:**

1. The user sees the application for the first time.
2. The application was not explained, onboarding is disabled.
3. The user is on the home page.

Steps:

№	Action	Expected result	Actual result
1	Go to the English text generation tab	User finds the text generation button	User finds the text generation button
2	The user chooses the topic, level and type of generated content. The user chooses the duration of reading the generated text	The user understands how to change options for text generation.	The user understands how to change options for text generation
3	Read the text to the end. Choose the words that are unknown to him/her.	The user selects words they don't know	The user selects words they don't know
4	Add unknown words to the Flashcards tab	The user adds words to the specified tab	The user adds words to the specified tab
5	Go to the Cards tab	The user goes to the specified tab. The selected words are displayed correctly	The user goes to the specified tab. The selected words are displayed correctly
6	The user uses flashcards to learn words and their meanings	Intuitive user experience with cards	Intuitive user experience with cards

7	Listen to the word	The user sees a button to listen to the word and clicks it	The user sees a button to listen to the word and clicks it
8	The user must assess the difficulty of the selected word	The user understands how to assess the complexity of words	The user did NOT understand how to evaluate the word. He was confused.

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.0.0

Network: Wi-Fi

***Conclusion:** *This type of testing is aimed at ensuring that the user understands without prompts how to use the program to learn foreign words. In this case, the word difficulty assessment is not clear, so the user is confused during this stage. Such a test case should not contain a specific plan for use. All stages should be presented in a generalized manner so that the user can see the actual result of using the program*
