

Title: Checking interface localization when switching languages**Priority:** Medium**Testing type:** Localization Testing**Author:** Dmytro**Date:** 09.07.2026**Preconditions:**

1. The user is authorized in the program.
2. The current interface language is English.
3. In the settings, the option to change the language to Ukrainian is available.

Steps:

№	Action	Expected result	Actual result
1	Open the application settings (Settings).	All elements are displayed in English, the translation is complete.	All elements are displayed in English, the translation is complete.
2	Change the interface language from "English" to "Ukrainian".	The language has changed, the interface has been updated.	The language has changed, the interface has been updated.
3	Check all application screens (main, profile, library, text generation, cards):	All text elements are translated into Ukrainian. There are no English words, technical codes, or null.	The "Cards" tab contains untranslated English words
4	Verify user-generated or AI-generated content.	All auxiliary buttons and options have been translated into Ukrainian	All auxiliary buttons and options have been translated into Ukrainian
5	Restart the program and check if the language is saved.	The program saves the settings. The language remains Ukrainian.	The program saves the settings. The language remains Ukrainian.

Environment:

Device: Samsung A26 5G

OS: Android 16

App version: 1.0.0

Network: Wi-Fi

***Conclusion:** *The "Cards" tab contains words that are not translated into Ukrainian. A bug report has been filed "BUG001_APP3_LOCALIZATION".*
